

**Boston & Maine Railroad**  
*Records*  
 2 boxes MSS, 2 boxes blueprints

With the exception of Folders 7, 8 and 9 in Box 2, the folders in this collection are classified by the New Hampshire cities and towns serviced by the Boston and Maine Railroad. Folders 7 through 9 in Box 2 contain agreements and correspondence related to the railroad and the Commonwealth of Massachusetts, New England Telephone and Telegraph and the railroad's White Mountain Division.

In general, contracts and correspondence within the folders are classified alphabetically by company. Within the company category, documents are classified by date. Most folders contain packets held together by paper clips. Documents within each packet are related to a specific business agreement of the B & M Railroad with one or more persons or companies; agreements that were sometimes altered or terminated over a number of years.

Blueprints have been removed to the Map area. They are classified by the town or city serviced by the railroad, and then by the date of the original contract. Some blueprints also are stamped with the number of the related contract.

A second box contains "rolled blueprints." A notation on the outside of each of these identifies the town or city of the related contract, the contract date, and contract number (if they exist).

**Concord, NH**
