

GENEALOGY WORKSHOP: USING DNA IN FAMILY HISTORY RESEARCH

Program: Using DNA in Family History Research Workshop

Dates: Saturday, November 23, 1 to 4 p.m.

Location: 30 Park Street, Concord, NH 03301

The return of this popular workshop is just in time to purchase ancestry kits as holiday gifts for family and friends! Advances in DNA research have had huge implications for the field of genealogy. Yet, with the growing number of companies and options, it can be difficult to know what test is best for you. In this workshop Tom Dwyer of the New England Historic Genealogical Society will discuss the types of genetic tests available to family historians, the genealogical problems the tests can—and cannot—assist you with, and ultimately how to choose the right one(s) to further your family history research. Space is limited, and registration is required. The cost is \$35 for members of the Society or the New England Historic Genealogical Society and \$50 for nonmembers. To register, mail this form with payment to Christopher Moore, New Hampshire Historical Society, 30 Park Street, Concord, NH 03301, call 603-856-0621 to register by phone and pay by credit card, or register online through Eventbrite.
