NEW HAMPSHIRE PATENTS COLLECTION
PATENTS, 1795-1935
44 Items, 1/2 Box

This is an artificial collection started with patents found in the vault in 1993. The provenance of these items is unknown.

The patents are arranged alphabetically by the name of the owner. Tracings have been made for the names of all NH persons owning patents or involved in patent transfers. Subject tracings have been made on the type of invention patented.

The box containing the main collection is shelved in accession number order; oversize are in the oversize drawers under "NH Patent Collection" and patents with presidential signatures are in the vault oversize collection by accession number.

There are other patents in the manuscripts collections, see the heading "PATENTS" in the subjects drawers of the card catalog.
