Collection Overview

Biographical Information/ Administrative Information:

Bryant Tolles was born in Hartford, CT. He received a BA degree in American Studies from Yale (1961), an MAT in History, also from Yale (1962), and a Ph.D. in History (New England and American Studies) from Boston University (1970). Mr. Tolles was assistant dean at Tufts University from 1965-71, assistant director for the New Hampshire Historical Society (Concord, NH) from 1972-74, executive director of Essex Institute (Salem, MA) 1974-84, and Professor of History and Director of the Museum Studies Program of the University of Delaware from 1984-2006. In retirement, he moved to Concord, NH with his wife, Carolyn. Focusing primarily on American architectural history in his scholarship, he lectured and published books on New Hampshire and Salem, MA architecture; summer cottages in the White Mountains; resort hotels of the White Mountains, the Adirondacks and the New England coast; and, college and university architecture and campus planning in New England before 1860. His non-profit

board service included the New Hampshire Humanities Council, The Squam Lakes Natural Science Center and the Canterbury Shaker Village.

Collection Scope and Content Note:

In the mid 1970s Bryant Tolles completed research for a book, New Hampshire Architecture. This collection of photographs and negatives was part of his research for that book, and consists of photos of buildings in New Hampshire towns. The photos are clearly identified by Mr. Tolles on the reverse of each photo, and the files are arranged alphabetically by town.

Arrangement:

This collection is arranged alphabetically, with each folder containing photos of a single town. Larger locations may have multiple folders. The photos are contained in folders in 5 letter size file boxes. Boxes 6 and 7 are small boxes containing negatives in sleeves. Negatives in this file are numbered sequentially, the numbers corresponding to numbers noted on the reverse of photographs. However, since the negatives largely are NOT labeled with locations, it would be difficult to move first from negative to photo.
